Dear Christian, Martin, Alexander and Heinz-Jürgen

I would like to thank you for taking the time to think of the plight of HIV/AIDS infected and affected families in South Africa. Dr Hans Spiegel has shared your correspondence with us.

As young people are the future of human kind, I strongly feel that the world needs more youths motivated to help with HIV in resource-poor communities.

I am deeply touched by your letter support and will share it with my colleagues. It strengthens our own resolve to find solutions.

Kind regards

MARK COTTON
